

# PRASAD DESHKAR

Senior Full Stack .NET Engineer | Senior WPF Developer | Certified SAFe® 6 Scrum Master

prasaddeshkar7@gmail.com | +91 9529481403 | prasaddeshkar7.github.io/resume

## PROFESSIONAL SUMMARY

Senior Software Engineer and Certified SAFe® 6 Scrum Master with 6+ years of experience building scalable backend systems, enterprise applications, and high-performance WPF (MVVM) desktop applications. Proven track record delivering high-performance solutions in safety-critical railway and healthcare domains. Expert in leading Agile delivery for complex system migrations (WinForms to WPF). Strong hands-on experience in microservices architecture and Angular development for production-grade clinical and operational applications.

## KEY ACHIEVEMENTS

- Performance Optimization:** Boosted database performance by 60%+ through targeted PostgreSQL query tuning in a real-time railway signalling system.
- Legacy Modernization:** Led the architectural shift from legacy WinForms to modern WPF (MVVM), resulting in a 40% reduction in UI-related technical debt and significantly better testability.
- Quality Assurance:** Established a robust testing culture, achieving 90%+ automated test coverage (NUnit, SpecFlow, Cypress) across the full application stack.

## CORE SKILLS

- Backend & Systems:** C#, .NET, ASP.NET Core, Web APIs, Entity Framework Core, C++/CLI (Interop), REST
- Frontend & Desktop:** Angular, HTML5, CSS3, WPF (MVVM)
- Cloud & DevOps:** Azure, AWS (S3, EC2, Lambda), CI/CD (Azure DevOps), Docker, Kubernetes, Git
- Methodologies:** Scaled Agile (SAFe 6), Scrum, Kanban, PI Planning, Test-Driven Development (TDD)
- Messaging & Data:** RabbitMQ, MQTT, PostgreSQL, CosmosDB
- Testing:** NUnit, MSTest, Moq, SpecFlow, Cypress

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer (.NET Full Stack / WPF) | Siemens Mobility, UK

Sept 2022 – Present

- Engineered real-time, safety-critical applications for railway signalling systems, ensuring high availability and strict adherence to industry safety standards.
- Architected the modernization of legacy WinForms tools to WPF MVVM, implementing a modular design that improved long-term extensibility and developer velocity.
- Optimized high-frequency data operations on PostgreSQL, delivering a 60% performance gain and reducing system latency during peak signalling loads.
- Enhanced system observability by implementing structured logging with Serilog, cutting incident diagnosis time by 30% through improved log traceability.
- Mentored junior developers on Agile best practices and WPF design patterns to maintain high code quality.

### Software Engineer – Full Stack (.NET, Angular, C++/CLI) | Siemens Healthineers, India

Mar 2020 – Aug 2022

- Orchestrated the transition from monolithic to microservices architecture, designing independently deployable services using ASP.NET Core that improved system scalability.
- Built responsive Angular UIs for clinical imaging workflows, integrating DICOM standards to allow radiologists to review and manage diagnostic data with high precision.
- Standardized API development using SOLID principles and Clean Architecture, ensuring highly maintainable and reusable code across multiple clinical modules.
- Maintained 90%+ test coverage by implementing a comprehensive automation suite spanning unit, integration, and end-to-end (E2E) tests.
- Actively facilitated PI (Program Increment) Planning sessions and sprint ceremonies, bridging the gap between technical requirements and business objectives to ensure 100% feature delivery.

## EDUCATION & CERTIFICATIONS

- Certified SAFe® 6 Scrum Master (SSM) — Scaled Agile, Inc. | Valid 2026–2027
- AWS Training: Architecting on AWS | AWS Technical Essentials
- Diploma in Advanced Computing — CDAC ACTS | Feb 2020
- B.E. Information Technology — YCCE, Nagpur | May 2018
